Abstract i

中文摘要 ii

Introduction 1

I Constructions of Hadamard Matrices 7

1 On J_m-Hadamard Matrices 8

1.1 J_m-Hadamard Matrices 9

1.2 Counterexamples 14

2 Further Results on J_m-Hadamard Matrices 17

2.1 Some Properties of J_m-Hadamard Matrices 18

2.2 Hadamard Matrices in J_m-Classes 23

3 On Craigen-de Launey's Constructions of Hadamard Matrices 28

3.1 Generalizations of Craigen's Theorem and of Craigen-Seberry-Zhang's Theorem 30

3.2 Minimum Exponent of Hadamard Matrices Resulting from t Hadamard Matrices 33

II Studies of Forests 39

4 On Enumeration of Plane Forests 40

4.1 A Catalan Identity 42

4.2 Some Results of Leaves 46

4.3 Generalizations of Motzkin-Catalan Identity 50

4.4 Some Riordan Families 53

5 The Chung-Feller Theorem Revisited 56

5.1 A Simple Proof of Chung-Feller Theorem 57

5.2 Bi-color Plane Forests 59

5.3 Semistandard Tableaux and Noncrossing Semiordered Pairs 62

5.4 Motzkin Paths with Flaws and a Labelled Minimum 66

6 Graceful Labellings of Some n-Caterpillars 71

6.1 Graceful Labellings of 2-Caterpillars 73

6.2 Graceful Labellings of $(r, m, n)-$Caterpillars 78

6.3 $n-$Partitions with Parameter k 85

6.4 Latin Squares and Graceful Labellings of 2^n-Caterpillars 95

Concluding Remarks 104

Bibliography 107

List of Figures

4.1 Two 6-Dyck paths with flaws symmetric with respect to the $x-$axis and their common corresponding plane forest of 6 edges 43

4.2 A plane forest of 10 edges with 5 vertices at level one and its two corresponding forests with 10 vertices and 5 components 44

4.3 A plane forest with 4 leaves and its corresponding plane forest with 4 internal vertices. 47

4.4 An illustration for the proof of Theorem 4.2.4. 49

4.5 An illuatration for the proof of Theorem 4.4.1. 55

5.1 3-Dyck paths with k flaws and their corresponding 3-Dyck paths with $k+1$ flaws for $k = 0, 1, 2$ 58

5.2 A bi-color plane tree with 5 edges and its corresponding 5-Dyck paths with 2 flaws 60

5.3 An illustration of the proof of Theorem 5.2.3. 61

5.4 An illustration for the proof of Theorem 5.3.2 64

5.5 Semistandard tableaux of shape 2×3. 65

5.6 An illustration for the proof of Theorem 5.3.4 67

5.7 An illustration for the proof of Theorem 5.4.1 68

5.8 An illustration for Corollary 5.4.2 68

5.9 An illustration for the proof of Theorem 5.4.4 70

6.1 A graceful labelling of a 2−caterpillar with the single path of even length. 75

6.2 A graceful labelling of a 2−caterpillar with the single path of odd length. 75

6.3 An illustration for the proof of Lemma 6.1.3. 77

6.4 An illustration for the proof of Theorem 6.1.2. 78

6.5 A graceful labelling of the $(3, 3, 3)$−caterpillar. 79

6.6 A graceful labelling of the $(4, 3, 3)$−caterpillar. 80

6.7 A graceful labelling of the $(4, 3, 3)$−caterpillar by algorithm A_2'. . . 85

6.8 An illustration for algorithm A_3 91

6.9 An illustration for the proof of Proposition 6.3.11 94

6.10 A graceful labelling of an 8−caterpillar in $\mathbb{T}_8$. 102

6.11 A graceful labelling of an 8−caterpillar not in $\mathbb{T}_8$. 103

6.12 An illustration for the proof of Theorem 6.4.9. 104

6.13 An example of remark. 104
